

ESTERAMIDE COMPOSITIONS, COPOLYMERS AND BLENDS THEREOF  
ABSTRACT OF THE DISCLOSURE

[0075] Novel esteramide compositions have been discovered. Copolymer composition comprising structural units derived from a substituted or unsubstituted diacid, a substituted or unsubstituted diol and said ester amide have also been disclosed. Also disclosed is a thermoplastic resin composition comprising structural units derived from substituted or unsubstituted polycarbonate and the copolyesteramides of the present invention. In addition methods for the preparation of the esteramides, copolymers and thermoplastic composition is discussed and articles derived from said thermoplastic composition is disclosed.
